

# Lesser Doublecollared Sunbird

Klein-rooibandsuikerbekkie    Ingcungcu

Orange, yellow, red and pink  
The flower colours call you in.  
Drinking nectar from sweet syrup tubes  
Merry-making, magic juice.

But do you only on nectar survive?  
"No! Sugar only makes us fly high!  
We eat spiders for protein too,  
Making us a strong and happy crew."

Why do you think sunbirds have such long beaks?

.....

What is in the 'merry magic juice' that makes sunbirds fly so high?

.....

What else do sunbirds eat? .....

## MAKE A BIRD FEEDER

Do some research on the internet and find out how to build a bird feeder with what you've got at home or plant some indigenous flowers in your garden for sunbirds to drink from.
